

Frome Class Newsletter January 2019

Happy New Year. I hope you all had a fantastic Christmas and the New Year has started well.

PE and Forest School

This term the children will be doing PE on a Monday and a Tuesday. The session on Monday will be with me and Tom from the PACES team (who last term ran the Dodgeball club) and on Tuesday with Adriano. We will also be running the daily mile (on the field when dry and the playground when wet) so the children will need trainers all week.

We will also be doing **Forest Schools** with Mr Sibcy every Wednesday in the afternoon so the children will need to bring in full forest schools gear. This will start on Wednesday 16th Jan and be for the whole term.

Inspire for Schools

This term we are going to be working with a group called Inspire for Schools who will lead a workshop based on Building Learning Power and developing resilience in the classroom. More information will follow as the term progresses.

Shakespeare Project

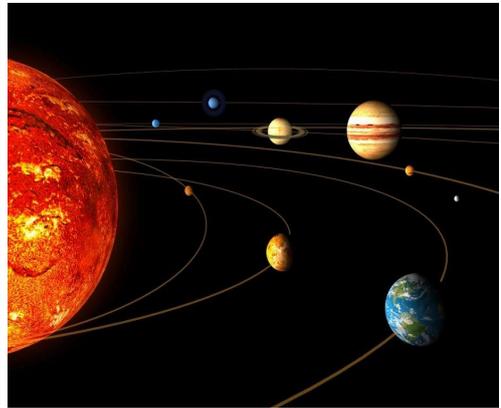

The children have made a great start to rehearsals for the Shakespeare Project Sharing day. We will continue to practise and get ready for the final production on 21st January. The performance will be at 5.30pm and there will be one other school also performing. The Courtyard is arranging tickets and you need to contact their Box Office direct. The class will be transported to the Courtyard by bus after lunch and will need to take a packed meal to have at tea time. Children need to be collected from the Courtyard after the performances at 6.45pm. I will send a letter with final details next week.

Homework

Homework will come out each week. It will be in the children's homework book and a copy will also be put on See-saw.

Space

This term our topic is all about Space and we will be learning about the different planets in our Solar System and exploring gravity. If the children have any books or information about these they would like to bring in to share they are more than welcome, please can all items be named.

To help your children the more they are able to find out the fun and amazing facts about space the better. There are loads of great websites, programmes on television or youtube (where you can see old episodes of Star Gazing Live or Tim Peake being interviewed) and plenty of books in the libraries.

Times Tables

The children have made great progress with their times tables so far this academic year and the more they keep practising the better prepared they will be for the move into Year 6.

And finally...

Any problems or concerns (or just to say when a child has really enjoyed something) please come and see me.
