

## Numeracy Progression

This document has been adapted from the NCETM Ready to Progress materials. It identifies the key conceptual knowledge and understanding required by pupils as they move from from Year 1 to Year 6 adding greater coherence to the objectives within the National Curriculum. It summarises the knowledge and understanding within the objectives for each year group and outlines the connections between these mathematical topics.

Further detail can be found in the DfE document; Curriculum Guidance: Key Stages 1 and 2 (June 2020) which contains links to required prior knowledge and future application.

### Key to mathematical strands used;

NPV	Number and place value
NF	Number facts
AS	Addition and subtraction
MD	Multiplication and division
F	Fractions
G	Geometry

Strand	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
<b>NPV</b>	1NPV–1 Count within 100, forwards and backwards, starting with any number.		3NPV–1 Know that 10 tens are equivalent to 1 hundred, and that 100 is 10 times the size of 10; apply this to identify and work out how many 10s there are in other threedigit multiples of 10.	4NPV–1 Know that 10 hundreds are equivalent to 1 thousand, and that 1,000 is 10 times the size of 100; apply this to identify and work out how many 100s there are in other four-digit multiples of 100	5NPV–1 Know that 10 tenths are equivalent to 1 one, and that 1 is 10 times the size of 0.1. Know that 100 hundredths are equivalent to 1 one, and that 1 is 100 times the size of 0.01. Know that 10 hundredths are equivalent to 1 tenth, and that 0.1 is 10 times the size of 0.01.	6NPV–1 Understand the relationship between powers of 10 from 1 hundredth to 10 million, and use this to make a given number 10, 100, 1,000, 1 tenth, 1 hundredth or 1 thousandth times the size (multiply and divide by 10, 100 and 1,000).
		2NPV–1 Recognise the place value of each digit in two-digit numbers, and compose and decompose two-digit numbers using standard and non-standard partitioning.	3NPV–2 Recognise the place value of each digit in three-digit numbers, and compose and decompose three-digit numbers using standard and non-standard partitioning.	4NPV–2 Recognise the place value of each digit in four-digit numbers, and compose and decompose four-digit numbers using standard and non-standard partitioning.	5NPV–2 Recognise the place value of each digit in numbers with up to 2 decimal places, and compose and decompose numbers with up to 2 decimal places using standard and non-standard partitioning.	6NPV–2 Recognise the place value of each digit in numbers up to 10 million, including decimal fractions, and compose and decompose numbers up to 10 million using standard and non-standard partitioning.
	1NPV–2 Reason about the location of numbers to 20	2NPV–2 Reason about the location of any twodigit	3NPV–3 Reason about the location of any threedigit	4NPV–3 Reason about the location of any fourdigit	5NPV–3 Reason about the location of any number with	6NPV–3 Reason about the location of any number up

	within the linear number system, including comparing using $<$ $>$ and $=$	number in the linear number system, including identifying the previous and next multiple of 10.	number in the linear number system, including identifying the previous and next multiple of 100 and 10.	number in the linear number system, including identifying the previous and next multiple of 1,000 and 100, and rounding to the nearest of each.	up to 2 decimals places in the linear number system, including identifying the previous and next multiple of 1 and 0.1 and rounding to the nearest of each.	to 10 million, including decimal fractions, in the linear number system, and round numbers, as appropriate, including in contexts.
			3NPV-4 Divide 100 into 2, 4, 5 and 10 equal parts, and read scales/number lines marked in multiples of 100 with 2, 4, 5 and 10 equal parts.	4NPV-4 Divide 1,000 into 2, 4, 5 and 10 equal parts, and read scales/number lines marked in multiples of 1,000 with 2, 4, 5 and 10 equal parts.	5NPV-4 Divide 1 into 2, 4, 5 and 10 equal parts, and read scales/number lines marked in units of 1 with 2, 4, 5 and 10 equal parts.	6NPV-4 Divide powers of 10, from 1 hundredth to 10 million, into 2, 4, 5 and 10 equal parts, and read scales/number lines with labelled intervals divided into 2, 4, 5 and 10 equal parts.
					5NPV-5 Convert between units of measure, including using common decimals and fractions.	
<b>NF</b>	1NF-1 Develop fluency in addition and subtraction facts within 10.	2NF-1 Secure fluency in addition and subtraction facts within 10, through continued practice.	3NF-1 Secure fluency in addition and subtraction facts that bridge 10, through continued practice.			

	<p>1NF–2 Count forwards and backwards in multiples of 2, 5 and 10, up to 10 multiples, beginning with any multiple, and count forwards and backwards through the odd numbers</p>		<p>3NF–2 Recall multiplication facts, and corresponding division facts, in the 10, 5, 2, 4 and 8 multiplication tables, and recognise products in these multiplication tables as multiples of the corresponding number.</p>	<p>4NF–1 Recall multiplication and division facts up to 12x12, and recognise products in multiplication tables as multiples of the corresponding number</p>	<p>5NF–1 Secure fluency in multiplication table facts, and corresponding division facts, through continued practice.</p>	
				<p>4NF–2 Solve division problems, with two-digit dividends and one-digit divisors, that involve remainders, and interpret remainders appropriately according to the context.</p>		

			3NF–3 Apply place-value knowledge to known additive and multiplicative number facts (scaling facts by 10).	4NF–3 Apply place-value knowledge to known additive and multiplicative number facts (scaling facts by 100)	5NF–2 Apply place-value knowledge to known additive and multiplicative number facts (scaling facts by 1 tenth or 1 hundredth).	
<b>AS</b>	1AS–1 Compose numbers to 10 from 2 parts, and partition numbers to 10 into parts, including recognising odd and even numbers.	2AS–1 Add and subtract across 10.	3AS–1 Calculate complements to 100			AS/MD–1 Understand that 2 numbers can be related additively or multiplicatively, and quantify additive and multiplicative relationships (multiplicative relationships restricted to multiplication by a whole number).
	1AS–2 Read, write and interpret equations containing addition ( ), subtraction ( ) and equals ( ) symbols, and relate additive expressions and	AS–2 Recognise the subtraction structure of ‘difference’ and answer questions of the form, “How many more...?”.	AS–2 Add and subtract up to three-digit numbers using columnar methods.			6AS/MD–2 Use a given additive or multiplicative calculation to derive or complete a related calculation, using arithmetic properties, inverse

	equations to real-life contexts.					relationships, and place-value understanding
		2AS–3 Add and subtract within 100 by applying related one-digit addition and subtraction facts: add and subtract only ones or only tens to/from a twodigit number.	3AS–3 Manipulate the additive relationship: Understand the inverse relationship between addition and subtraction, and how both relate to the part–part–whole structure. Understand and use the commutative property of addition, and understand the related property for subtraction			6AS/MD–3 Solve problems involving ratio relationships.
		2AS–4 Add and subtract within 100 by applying related one-digit addition and subtraction facts: add and subtract any 2 twodigit numbers.				6AS/MD–4 Solve problems with 2 unknowns.
<b>MD</b>		2MD–1 Recognise repeated addition contexts,	3MD–1 Apply known multiplication and	4MD–1 Multiply and divide whole numbers by 10 and	5MD–1 Multiply and divide numbers by 10 and 100;	See links in <b>AD</b>

		representing them with multiplication equations and calculating the product, within the 2, 5 and 10 multiplication tables	division facts to solve contextual problems with different structures, including quotitive and partitive division.	100 (keeping to whole number quotients); understand this as equivalent to making a number 10 or 100 times the size.	understand this as equivalent to making a number 10 or 100 times the size, or 1 tenth or 1 hundredth times the size.	
		2MD–2 Relate grouping problems where the number of groups is unknown to multiplication equations with a missing factor, and to division equations (quotitive division).		4MD–2 Manipulate multiplication and division equations, and understand and apply the commutative property of multiplication.	5MD–2 Find factors and multiples of positive whole numbers, including common factors and common multiples, and express a given number as a product of 2 or 3 factors.	
				4MD–3 Understand and apply the distributive property of multiplication.	5MD–3 Multiply any whole number with up to 4 digits by any one-digit number using a formal written method.	
					MD–4 Divide a number with up to 4 digits by a one-digit number using a formal written method, and interpret	

					remainders appropriately for the context	
<b>F</b>			3F–1 Interpret and write proper fractions to represent 1 or several parts of a whole that is divided into equal parts.			6F–1 Recognise when fractions can be simplified, and use common factors to simplify fractions.
			3F–2 Find unit fractions of quantities using known division facts (multiplication tables fluency).		5F–1 Find non-unit fractions of quantities.	6F–2 Express fractions in a common denomination and use this to compare fractions that are similar in value.
			3F–3 Reason about the location of any fraction within 1 in the linear number system.	4F–1 Reason about the location of mixed numbers in the linear number system.		6F–3 Compare fractions with different denominators, including fractions greater than 1, using reasoning, and choose between reasoning and common denomination as a comparison strategy

				4F–2 Convert mixed numbers to improper fractions and vice versa	5F–2 Find equivalent fractions and understand that they have the same value and the same position in the linear number system.	
			3F–4 Add and subtract fractions with the same denominator, within 1.	4F–3 Add and subtract improper and mixed fractions with the same denominator, including bridging whole numbers.	55F–3 Recall decimal fraction equivalents for halves, quarters, fifths and tenths, and for multiples of these proper fractions.	
<b>G</b>					5G–2 Compare areas and calculate the area of rectangles (including squares) using standard units.	
	1G–2 Compose 2D and 3D shapes from smaller shapes to match an example, including manipulating shapes to place them in particular orientations.		3G–2 Draw polygons by joining marked points, and identify parallel and perpendicular sides.	4G–1 Draw polygons, specified by coordinates in the first quadrant, and translate within the first quadrant.		6G–1 Draw, compose, and decompose shapes according to given properties, including dimensions, angles and area, and solve related problems.

				4G–2 Identify regular polygons, including equilateral triangles and squares, as those in which the side-lengths are equal and the angles are equal. Find the perimeter of regular and irregular polygons		
				4G–3 Identify line symmetry in 2D shapes presented in different orientations. Reflect shapes in a line of symmetry and complete a symmetric figure or pattern with respect to a specified line of symmetry.
